

AAS Committee on the Status of Women

Issue of February 15, 2019

eds: Nicolle Zellner, Heather Flewelling, Maria Patterson, JoEllen McBride, and Ale Aloisi (guest ed.)

This week's issues:

1. Cross-post: The Women Who Contributed to Science but Were Buried in Footnotes
2. Special Article Collection Celebrates Annual Reviews Contributors
3. Special edition of the Lancet: Advancing women in science, medicine and global health
4. More women and girls needed in the sciences to solve world's biggest challenges
5. How Scientists are Fighting Against Gender Bias in Conference Speaker Lineups
6. Is This The Year Of Women In Science?
7. European Space Agency Celebrates Women in Science with Astro Pi Challenge
8. Reflections from a Nobel winner: Scientists need time to make discoveries
9. 23 Black Female Scientists Who Changed The Damn World
10. Women You Should Know
11. This neuroscientist is fighting sexual harassment in science -- but her own job is in peril
12. How to Submit to the *AASWomen* Newsletter
13. How to Subscribe or Unsubscribe to the *AASWomen* Newsletter
14. Access to Past Issues of the *AASWomen* Newsletter

1. Cross-post: The Women Who Contributed to Science but Were Buried in Footnotes
From: Christina Thomas via womeninastronomy.blogspot.com and Kelly Lockhart
[kelly.lockhart_at_cfa.harvard.edu]

"In science, the question of who gets credit for important work -- fraught in any field -- is set down on paper, for anyone to see. Authorship, given pride of place at the top of scientific papers, can advance reputations and careers; credits buried in the rarely read acknowledgments section do not.

2. Special Article Collection Celebrates Annual Reviews Contributors
From: Rick Fienberg [rick.fienberg_at_aas.org]

"Female scientists have been among Annual Reviews' Authors and Editors since its founding in 1932. Our special article collection in recognition of the United Nation's [4th International Day of Women and Girls in Science](#) features 19 articles from pioneers in the biomedical, life, physical, and social sciences. All articles are available free to download through March 31."

3. Special edition of the Lancet: Advancing women in science, medicine and global health
From: JoEllen McBride [joellen.mcbride_at_gmail.com]

From the editorial in the Journal:

"To be 'feminist' in any authentic sense of the term is to want for all people, female and male, liberation from sexist role patterns, domination, and oppression." bell hooks made this clear and powerful statement in her 1981 study of sexism, racism, and the feminist and civil rights movements *Ain't I a Woman*:

Black Women and Feminism. Almost 40 years on, the world is still reckoning with pervasive and inexcusable gender inequality underpinned by bias and sexism, and research and health care are no exception. Today, *The Lancet* publishes a theme issue on advancing women in science, medicine, and global health, with the aim of showcasing research, commentary, and analysis that provide new explanations and evidence for action towards gender equity.

4. More women and girls needed in the sciences to solve world's biggest challenges

From: Alessandra Aloisi [aloisi_at_stsci.edu]

"The role of science education in a changing world cannot be undervalued: it is [estimated](#) that fully 90 per cent of future jobs will require some form of ICT (information and communication technology) skills, and the fastest growing job categories are related to STEM (science, technology, engineering and mathematics), with recent studies indicating 58 million net new jobs, in areas such as data analysis, software development and data visualization.

'But women and girls continue to be extremely under-represented in the sciences. [Data](#) from [UNESCO](#) (the UN's agency for education, science and culture) shows that less than a third of all female students choose STEM-related subjects in higher education, whilst just three per cent of women choose ICT subjects."

5. How Scientists are Fighting Against Gender Bias in Conference Speaker Lineups
From: JoEllen McBride [joellen.mcbride_at_gmail.com]

This *Science Magazine* article highlights the Request a Woman Scientist database put together by 500 Women Scientists.

6. Is This The Year Of Women In Science?

From: Alessandra Aloisi [aloisi_at_stsci.edu]

By Melanie Fine

"In honor of the International Day of Women and Girls in Science, we look back at the contributions of two scientists who made 2018 remarkable.

Philipp von Jolly, trying to dissuade a young Max Planck from entering physics, remarked that "almost everything is already discovered, and all that remains is to fill a few unimportant holes." Luckily, Planck, who went on to become the father of quantum physics, ignored his advice.

Attempting to identify any one year as the year of women in science seems to embody the same hubris and is, with any hope, similarly premature."

7. European Space Agency Celebrates Women in Science with Astro Pi Challenge
From: Alessandra Aloisi [alosisi_at_stsci.edu]

By Elizabeth Howell

"Coding will become even more important in space exploration as humans explore faraway places, says a Canadian astronaut candidate in a new video.

"To celebrate the International Day of Women and Girls in Science (today, Feb. 11), Jennifer Sidey-Gibbons spoke to the European Space Agency about her female role models and the importance of women in coding history.

"[ESA released the video](#) to promote its [Astro Pi Challenge](#), an ESA Education program done in collaboration with the Raspberry Pi Foundation. The program offers students the chance to do space-based scientific investigations using Raspberry Pi computers on the International Space Station (ISS)."

8. Reflections from a Nobel winner: Scientists need time to make discoveries
From: John Wenzel [jwenzela_at_albion.edu]

In 2018, Donna Strickland was awarded the Nobel Prize in Physics. Here she argues that scientists must be free to be curious, without the pressure to produce results. ... "After all, you can't have the applications without the curiosity-driven research behind it. Learning more about science -- science for science's sake -- is worth supporting."

<https://www.buzzfeed.com/anjali Patel/she-blinded-me-with-science>

10. Women You Should Know
From: JoEllen McBride [joellen.mcbride_at_gmail.com]

You can download these awesome Women You Should Know posters to fill your room with some amazing female role models.

Check out the posters and download them at

<https://womenyoushouldknow.net/downloadable-stem-role-models-posters/>

11. This neuroscientist is fighting sexual harassment in science -- but her own job is in peril
From: JoEllen McBride [joellen.mcbride_at_gmail.com]

BethAnn McLaughlin (@McLNeuro) has had her tenure decision at Vanderbilt University Medical Center reversed due to her activism around the #MeTooSTEM movement.

12. How to Submit to the *AASWOMEN* newsletter

To submit an item to the *AASWOMEN* newsletter, including replies to topics, send email to aaswomen_at_aas.org

All material will be posted unless you tell us otherwise, including your email address.

When submitting a job posting for inclusion in the newsletter, please include a one-line description and a link to the full job posting.

Please remember to replace "_at_" in the e-mail address above.

13. How to Subscribe or Unsubscribe to the *AASWOMEN* newsletter

Join AAS Women List by email:

Send email to aaswlist+subscribe_at_aas.org from the address you want to have subscribed. You can leave the subject and message blank if you like.

Be sure to follow the instructions in the confirmation email. (Just reply back to the email list)

To unsubscribe by email:

Send email to aaswlist+unsubscribe_at_aas.org from the address you want to have UNSubscribed. You can leave the subject and message blank if you like.

To join or leave AASWomen via web, or change your membership settings:

<https://groups.google.com/a/aas.org/group/aaswlist>

You will have to create a Google Account if you do not already have one, using <https://accounts.google.com/newaccount?hl=en>

Google Groups Subscribe Help:

<http://support.google.com/groups/bin/answer.py?hl=en&answer=46606>

14. Access to Past Issues

<https://cswa.aas.org/AASWOMEN.html>

Each annual summary includes an index of topics covered.
